

Says

What have we heard them say?  
What can we imagine them saying?

Thinks

What are their wants, needs, hopes, and dreams?  
What other thoughts might influence their behavior?

It Contains information is longitudes latitudes and altitudes of airport across the world.

From a business perspective,the dataset can hava a significant impact on the aviation industry

The dataset is intended to help stakeholders make informed decisions growth

Up to date information on the world wide air transportation network.

Growth,investment, capacity planning, and infrastructure development.using analytics and tools visualization like Tableau.

The dataset can be used by investors to identify promising for invesment in the aviation industry

By providing stakeholders with a comprehensive the dataset can help to optimize routes and reduce congestion in the air

challenges,and oppoetunities, associated with the aviation industry.

It discusses various factors that affect the flightdelay, flightroute etc. The survey can a provide.

Can contribute to the overall well beingof communities aroundworld,by making air travel more accessible,affordable, and eco friendly

A Comprehensive collection of information on airports,airlines and their routes

Airline transportation networks more efficient,safe,and environmentally sustainable

Optimize routes,improve operational efficiency,and enhance customer experience

The dataset can help stakeholders stay ahead of the curve in dynamic and rapidly changing industry

Global air transportatioon network involves reviewing academic articles,books,and other sourcesrelated

To identify trends and patterns in the air transportation network,providing valuable

Does

What behavior have we observed?  
What can we imagine them doing?

Feels

What are their fears, frustrations, and anxieties?  
What other feelings might influence their behavior?
